Must Know Principles and Rules for Planning and Delivery of Implant Restorations: Single Crowns to Full Arch Bridges

PRESENTED BY AVINASH S. BIDRA BDS, MS, FACP
Program Director Prosthodontic Residency, UConn

FRIDAY, MAY 3, 2024

synopsis

This presentation will discuss principles and rules for delivery of implant-supported crowns and bridges that can be immediately and easily incorporated in clinical practice and ensure long term success.

The second part of the presentation will focus on must know diagnostic and treatment planning keys for full arch fixed prosthesis using Bone, Smile, Lips and Gums as determinant factors.

Topics

- Principles of inserting crowns on natural teeth vs dental implants
- Rules for inserting crowns and bridges on dental implants
- Preventing excess residual cement
- Screw-retained vs. cement-retained restorations.
- A prosthodontic safety checklist to obtain consistent results
- Types of patients seeking implant-supported fixed prosthesis
- Managing the "terminal dentition" patient seeking a fixed prosthesis

speaker

Board Certified Maxillofacial Prosthodontist **Avinash S. Bidra, BDS, MS, FACP** is a Professor and Director of the Prosthodontics Residency Program at UCONN School of Dental Medicine. His private practice in Glastonbury is restricted to Implantology. He has lectured at national and international meetings, as well as published extensively in international scientific journals. He has developed diagnostic and treatment protocols and surgical and prosthodontic safety checklists that are used by several clinicians as well as prosthodontics residency programs in the United States. Dr Bidra is the recipient of the Distinguished Clinician Award as well as Educator of the Year Award by the American College of Prosthodontists.

Schedule

7:00 to 8:00

Breakfast & Registration

8:00 to 1:00
